

Procurement Opportunity Webinar Senegal Gas Pipeline Backbone Project

Wednesday 22nd September 2021 @ 10:00 AM CDT

The pipeline backbone project is Senegal's first major onshore gas transmission pipeline. The project will connect offshore gas fields to nine power plants.

This 45-minute webinar is incredibly relevant for vendors and service providers. In this first 90-mile project phase, the import estimate is ~90 million, including:

- Materials – pipe, valves, metering, pressure control...
- Services – engineering, construction, HDD, inspection, cathodic protection, commissioning, training...
- Technology – communications, SCADA, remote monitoring, leak detection...

For those companies expressing interest in supplying goods, services, or technology for the construction, operation, and maintenance of the pipeline, Advisian will arrange follow-on consultations with RGS/FONSIS.

Agenda	Speakers
Welcome <ul style="list-style-type: none">• RGS• USTDA	FONSIS Babacar Gning – Chief Financial Officer
Project Brief	USTDA
Procurement Opportunities <ul style="list-style-type: none">• Materials• Services• Technology	Jillian Foerster – Country Manager Sub-Saharan Africa Region
Questions	Advisian Christopher Pioli – Study Manager Marcus Sexton – Pipeline Lead
